Profile

I am a passionate and detail-oriented Frontend Developer with expertise in React.js, JavaScript, and modern UI/UX principles. I focus on building responsive and interactive web applications, and I am committed to optimizing performance and enhancing user experience. Currently, I am expanding my skills in full-stack development with an emphasis on React optimization and API handling.

Education

Bachelor of Computer Application
Government Arts college, Trichy

08/2021 to 5/2024

Projects

E-commerce

- Built a functional e-commerce platform with product listing, filtering, and sorting features using React and API integration.
- Implemented dynamic product pages and search functionality for better user experience.
- Managed global state using React Context API for cart operations.
- Optimized component rendering for faster loading and smooth performance.

ToDo_with User CRUD

- Developed a task management application with user registration and login functionalities using React and API integration.
- Implemented CRUD operations (Create, Read, Update, Delete) for user tasks
- Managed form inputs with proper validation and error handling.
- Integrated React Router for page navigation (login, registration, and dashboard).

Skills

Programming Language: Javascript
Web Development : Html5 , CSS3
Framework : Reactjs, Tailwindcss

Tools : GitHub , VsCode
API Handling : Fetch API , RESTful APIs

Key Achievements

Leetcode :

Developed and deployed 50+ frontend projects using modern technologies like React.js, JavaScript, showcasing expertise in UI/UX design and performance optimization.

Solved LeetCode problems, improving problem-solving skills.

Applied optimized solutions in JavaScript, enhancing logical thinking and coding efficiency.

Language

Tamil : Native

English : Intermediate
